

LONG LASTING MOSS KILLER

ELIMINATOR OF MOSS, LICHEN AND FUNGI ON EXTERNAL SURFACES

Marley Waterproofing Long Lasting Moss Killer is specially formulated to remove and control moss, lichen, mildew, fungi and algae on a wide range of external surfaces. It is ready to use straight from the container.

Marley Waterproofing Long Lasting Moss Killer is used as a preparation product before applying further waterproofing treatments, and has a powerful preventative action, helping to eliminate future moss and lichen growth.

Marley Waterproofing's Guide to Successful Waterproofing

STEP 1 Destroy any moss growth using Marley Waterproofing Long Lasting Moss Killer

STEP 2 Apply Marley Waterproofing Quick Drying Roof Primer to stabilise dusty or porous surfaces

STEP 3 Apply one of Marley Waterproofing's quality waterproofing membranes or roof repair products

Directions for Use

Surface Preparation: Remove excess moss and lichen growth manually by using a high pressure washer or stiff broom.

Application: Apply Marley Waterproofing Long Lasting Moss Killer generously over the surface using a brush or spray applicator. (NB. If spraying, take account of the wind conditions to ensure that spray drift does not damage adjacent plants and greenery) Allow the product to act until the moss or lichen has taken on a greyish black colour. One application is normally sufficient to give a completely effective treatment, but in cases of persistent growth, repeat the application. Do not rinse. Remove dead remnants of moss and algae with a stiff broom.

Coverage: 5-10m²/litre, depending on the severity of attack.

Cleaning: Tools can be cleaned with water.

Storage: Containers should be kept sealed in a cool, dry, environment. Partly used containers may be resealed and used again after correct storage. Always store and transport in a secure upright position.

Safe Handling

Avoid contact with skin and eyes by careful working and use of gloves and eye protection.

In case of contact with skin, wash immediately with plenty of water. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Do not breathe in spray. When using, do not eat, drink or smoke. A safety data sheet is available on request.

Disposal: Do not empty into drains. Some local authorities have special facilities for the disposal of waste liquids.
